Email Communication #8

This message was sent to MCIR Notify, IAP, LHD Health Officers, LHD Medical Directors, MCIR/SIRS, Bio Clerk, PH Imms Lead, MSMS, Tribal Health Coordinators, MCIR Pharmacy Contacts, DSO and Immunization listservs.

Subject: MCIR Modernization September Highlights: Updates on the transition to a new IIS

As we move into fall, we're excited to share the latest updates on MCIR Modernization.

Update on STC and Harris Computer

STChealth, the vendor supporting Michigan's immunization information system, was recently acquired by Harris Computer. MCIR Modernization will remain unchanged, and we will continue to keep you informed as additional information becomes available.

Reminder for Immunizing Providers

Timely entry helps ensure accurate immunization records and supports statewide public health efforts. Please remember that all vaccines administered to patients 0 through 19 years of age must be entered into [MCIR within 72 hours](#).

Keep Your MCIR Contact Information Up-to-Date

Now is also a great time to review and update your site's contact information in MCIR. Keeping this information current helps us communicate important updates with the right people at your organization. To update your site information, log in to MCIR and follow the steps provided here: [How to Edit Site Name, Address, Phone, Fax and Email](#).

Did You Know?

Michigan will be the first state in the STC|ONE consortium to train using its new interactive online Learning Management System courses. This exciting feature allows users to learn at their own pace, test their knowledge, and explore modules designed to fit individual user roles, bringing a modern, flexible approach to MCIR training.

Thank you for your continued support as we move toward launching Michigan's new immunization information system in late March 2026.

If you have any questions or suggestions about the transition, please contact us at MDHHS-MCIRTransition@michigan.gov. Please visit MCIR.org/Modernization for the latest information on the project.
